

KARIN DOM FOUNDATION

*BOOKLET FOR CHILDREN WITH AUTISM*

## **The world is fighting with coronavirus**

When the virus enters a person's body, it can make you feel sick and have fever, runny nose, cough, shortness of breath

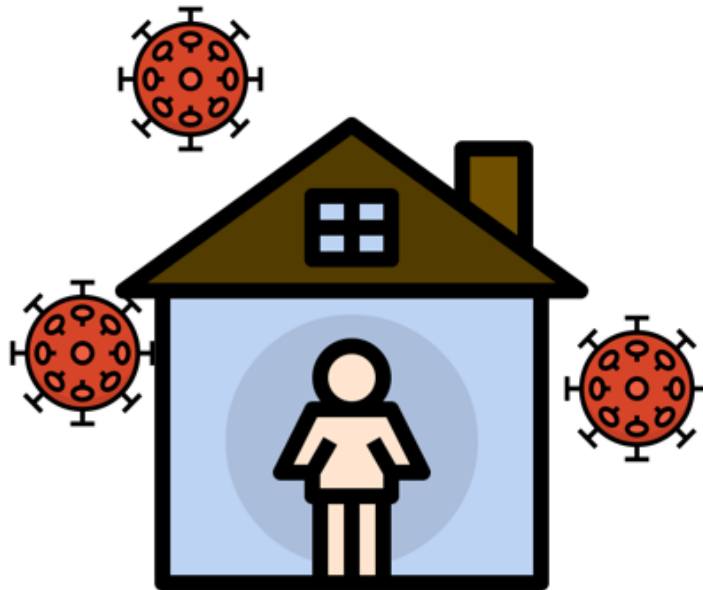

If someone gets sick, he or she goes to the hospital to receive treatment.

The virus is transmitted by close contact with an already infected person or by touching surfaces contaminated with the virus.

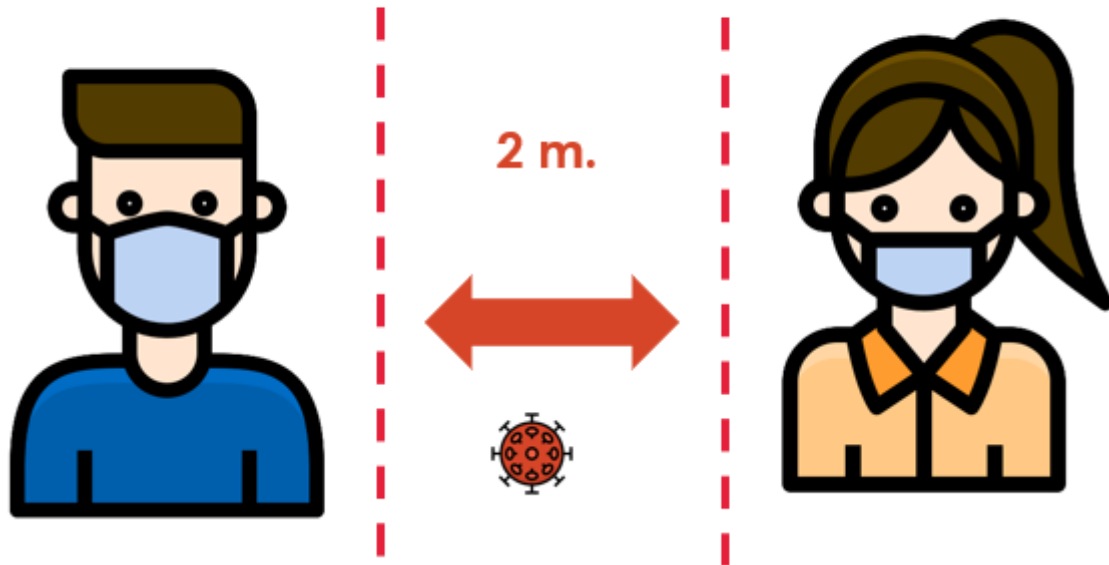

That's why we stay at home. It is safe at home!

That's why we wash our hands often and clean with disinfectant things we bring in from outside.

When we are outside and meet other people, we stay at a distance of 2 meters away from them.

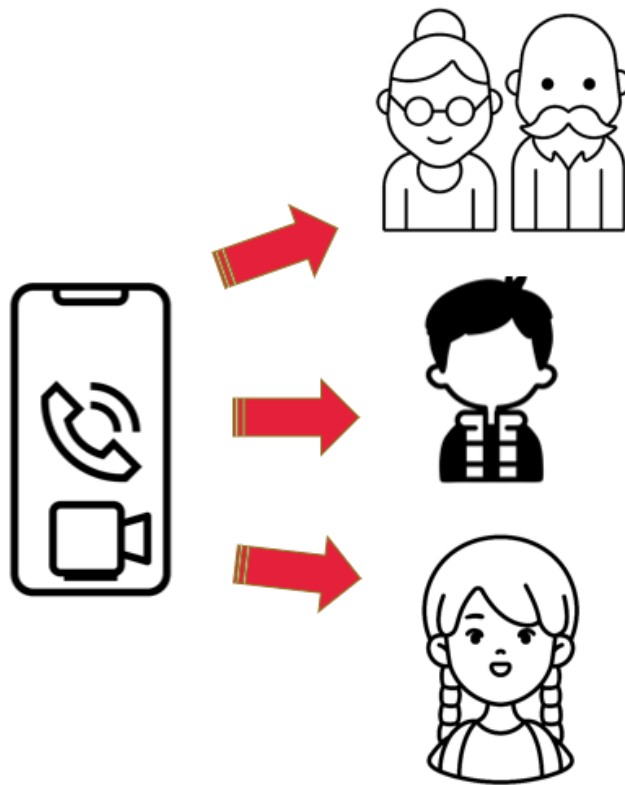

When we are outside we do not touch any surfaces. If we have to touch something, we wash our hands thoroughly with warm water and soap or use a disinfectant.

Places where there are a lot of people, are closed (schools/ kindergarten / therapeutic center / bus station / airport / playground / restaurants / shopping centers). This is in our favor, so we can stay healthy!

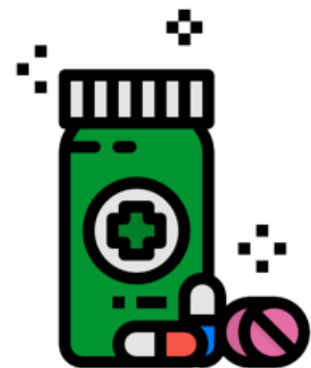

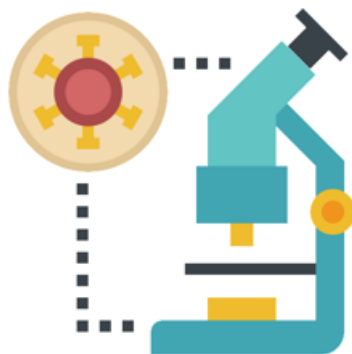

We do not visit other people. But we can see them and talk to them via phone or computer.

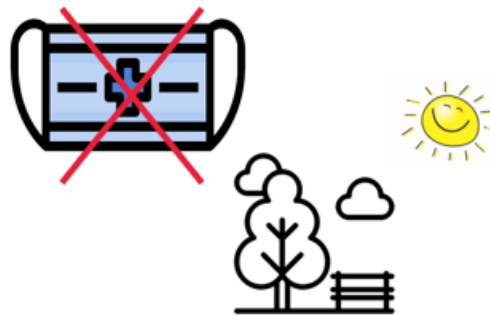

We are not alone in this situation. All people on earth are affected.

Teams of scientists and doctors are working to save us. A cure / vaccine is sure to be found.

When we are outside:

- We may stay without a mask!
- We do not touch our face (eyes, mouth, nose)!
- We keep distance!
- We wash our hands thoroughly after a walk!

Our home is the safest place now! We have a lot of time to be together and play at home. This will end and life will be the same again.

**From the team of Karin Dom Foundation:**

**Be healthy and believe in the good!**

**Tell stories, read and talk to the young child, because children feel our anxiety, and changing our daily lives is stressful for both adults and children!**

**Author:** Virginia Vasileva - psychologist and trainer at Karin Dom. Vergi conducts group and individual therapy sessions with children with various difficulties using a family-centred and family-mediated approach. Certified ABA and PECS therapist. Since 2017 holds European certificate in psychotherapy.
